

TAF Phase -4

Procedure

Step 2: Line Manager Approval

- After the Line Manager approves the request, a new sub-request (sub-branch of the main request) will be automatically generated and routed to the SSC Department for Advance Approval or Rejection.
- Meanwhile, the main TAF request will continue progressing independently to the next steps, including MSD approval and subsequent workflow activities, without waiting for SSC action.

SSC_Department Execution

- The SSC_Department may take action at any stage during the main TAF workflow.
- This approach ensures that SSC processing runs independently and does not block or delay the execution of other workflow steps.
- The newly generated sub-request will have its own unique Request ID and separate workflow history.
- The sub-request history will include details such as request initiator information and the Line Manager's approval status.
- The sub-request will contain an Advance Amount field, where SSC must enter the approved advance amount issued to the initiator.
 - **For Approval:** Entry of the advance amount will be mandatory.
 - **For Rejection:** Entry of the advance amount will not be mandatory; however, remarks will be mandatory.
- In the Main TAF request, there must be clear visibility of the Sub-Request ID (Advance Request ID) to enable tracking and monitoring.
- Similarly, within the Sub-Request, the corresponding Main TAF Request ID must be visible to ensure complete traceability and linkage between both workflows.

Advance Amount Module:

- Requests of Advance from TAF will fall in Advance Amount module.
- Advance Module is sub part of TAF.
- User can also create only advance request from this module. Following in Advance Hierarchy:
- Request initiation → Line Manager Approval → SSC Department → Complete
- Email Intimations for every step: Subject + Body Shared later

Reports: can be exported as Excel/PDF as well

SLA report of each request:

- How much time taken by each step to Approve, Execute, Send Back and Reject, Doc-ID, employee name, employee ID, Advance taken, Department of Initiator.

TAF Email Subject:

- Concatenate these with all TAF emails → TAF, Request Number, Employee Name, Employee ID

Advance Report:

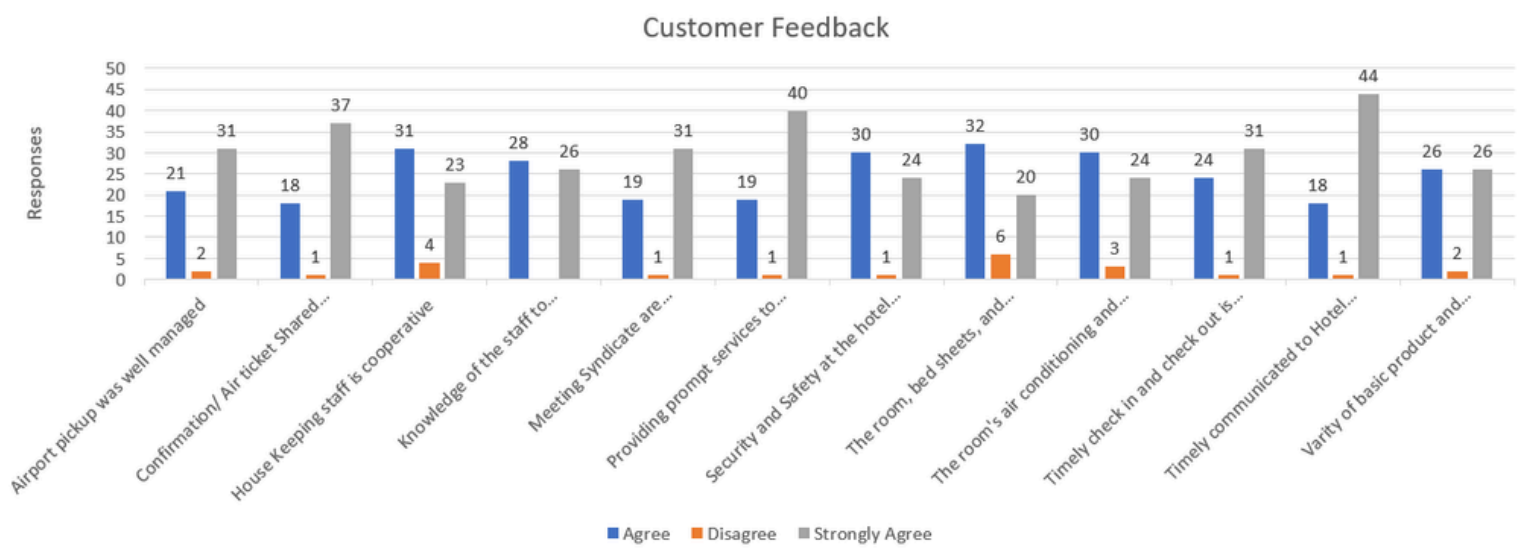

- how much advance (Approved/Rejected) an employee took from past till date.
- when click on report. It shows the list of all employees who took advances (by total TAF requests and sum of their Advance as whole)
- Can search specific employee.
- can search Department Wise.
- Date Range.

Dashboard: (need view button with each chart to see further details of it & Export button)

- Date range to see insight to specific time
- SLA Dashboard of each request
- Advance taken by employee (Sum of all requests)
- Department Wise Advance
- Max time Taken by an employee to Approve/Execute or Reject request.
- Minimum time taken by employee to Approve/Execute or Reject request.
- Person wise, Hotel Wise, City Wise.
- Customer Feedback (Survey Form) Chart with date Range to select viewable insight
- Option to download chart as JPG.

Customer Feedback

July, 2025 to September, 2025

Total Response 676
Positive Response (Agree and Strongly) 96.6% (96.6% Service Level)
Disagree:- 3.4%
